

PERSONAL PROFILE

Coming from a diverse background of studies and work experiences, I have studied computer science at a young age and moved away from the area for a long period. I recently reignited my passion for this field, took a leap and decided to return to IT and pursue a career in tech.

I have recently completed a Software Development Bootcamp at Just IT, where I've learnt the fundamentals of HTML, CSS, JavaScript, MySQL, MongoDB and Python. Please, head to my portfolio for a display of my projects and what I can do with these recently acquired skills.

I am looking for an opportunity to apply my knowledge at a company that is willing to allow me to learn and provide me with a challenging environment and the space to progress in my career as a developer.

Software Development Skills

Python | MySQL | MongoDB

Web Technology

HTML5 | CSS3 | JavaScript

Core Programming Languages

JavaScript | Python

• I am currently enrolled at Udemy, learning NodeJS,

ReactJS, VueJS, Angular, Sass and Typescript.

EMPLOYMENT HISTORY

GIMO, LONDON

(JUL 2019 - JUL 2022)

SENIOR CONTENT EXECUTIVE

- As a senior member of the content team, I was responsible for organising daily tasks on Jira, making sure all tasks were completed accurately and within the deadlines.
- I attended weekly meetings with the line manager and other senior members of the team to report any problems, suggest improvements and prepare ahead for the upcoming weeks.
- I communicated with my team and was responsible for communicating with other teams within the company to discuss tasks and extend deadlines when needed.
- My role was not only to coordinate tasks, but I was also responsible for the Brazilian market of a Casino / Sports Booker lead provider, as a Content Writer, Translator and Editor.
- Being responsible for quality assurance of all tasks, I was the first point of support for the content team and other teams within the company to resolve any issues that surfaced with tasks assigned to our team.

TESTRONIC, LONDON

(SEP 2017 - JUL 2019)

LQA TECHNICIAN

- As part of a multi linguistic team, I was responsible for testing the Brazilian Portuguese content included in video games within the deadlines, according to each project and client requirements.
- During the testing phase, the team would communicate regularly to share findings, tips, and common bugs with other members of the team and the project managers.
- Having worked in small and large game titles, the length of projects varied from one day to several months, and the different platforms (PlayStation, Xbox, Nintendo Switch, Android, iOS, Steam, among others) required quick adaptability and a flexible approach constantly.
- I reported bugs to the software development team in Jira, with detailed steps to reproduce and clear necessary changes.

KANTAR MEDIA, LONDON

(SEP 2012 - FEB 2019)

MEDIA ANALYST

- As a media analyst I was responsible for pulling data from different media sources, such as print, television, radio and online, according to client requirements. The projects included media from the Brazilian, American and UK markets.
- For this role, I solely received a workload and a deadline from my line manager, this helped me to improve my time management and organisational skills, as I was free to work on my own chosen hours. I made sure that the deadlines were met meticulously.
- I communicated my line manager about issues, suggested improvements and requested extensions when needed.

PROJECTS

RodWeather App

A weather app built with **HTML**, **CSS**, and **JavaScript**, pulling data from 3 different APIs, featuring **geolocation functionality**, **autocomplete** and **background images** related to the weather location displayed.

RodKrypto App

A cryptocurrency app built with **HTML**, **CSS**, and **JavaScript**, pulling data from 3 different APIs, featuring the **top 10 cryptocurrencies price list**, in real time, displayed in GBP.

RodFlix database

A database to navigate and perform **CRUD** and **Filter operations**, applying changes in real time. Built with **Python** and **SQLite**.

• *More projects coming soon.*

HOBBIES

Reading and learning new skills. I am currently reading the biography of Steve Jobs by Walter Isaacson.

I play video games, love football, tv series and films. I enjoy following content creators on YouTube and Twitch.

Running to keep fit and move my body. I completed the ASICS London 10k in 2021, for Great Ormond Street Hospital.

Cooking and spending time with my family.

FREELANCE, LONDON

(DEC 2015 - AUG 2018)

GRAPHIC DESIGNER

- As a freelance graphic designer, I created visual solutions for individuals and companies.
- I have solved problems and faced creative challenges to produce logos, brochures, invitations for a variety of events, restaurant menus, business cards, newsletters, among other creative projects.
- I communicated with clients to gather requirements, inform of progress, get feedback, apply changes, and deliver completed products.

REVISTA DETALHE (MAGAZINE), LONDON

(FEB 2010 - MAR 2012)

EDITOR | JOURNALIST

- I was responsible for the Cinema and Sports section of the magazine, writing articles and editing pieces written by other journalists.
- We had weekly meetings to discuss the progress of the articles, decide on upcoming topics, and address any issues faced between meetings.
- I communicated regularly with team members, other sections within the magazine, and mainly with film distributors and people to be interviewed.

INTERESTS & ACHIEVEMENTS

COMPUTING

To complete the computer science certificate course back in 2002, I was required to be an intern and at that time, I created a MS Access database for a reseller company, storing all their clients' data.

Recently, I have completed a skills bootcamp, allied with Codecademy and Udemy. I have been working on personal projects to develop my skills, and a selection of those are available on my portfolio at **rodrigodelascio.tech**.

I am currently aiming in improving my knowledge of JavaScript, CSS and adding a few frameworks to my skillset. I am enrolled at a few Udemy courses and am learning how to work with Node JS, React JS, Vue JS, Angular, Sass and Typescript.
